TIIDELab,

Frontend Web Development 2021

University of Lagos,

B.Sc. Microbiology 2018

ABOUT ME

A budding Software Engineer looking out to take a challenging role as a Front-End Web Developer in a dynamic institution where I can build on my programming knowledge, enhance my technical skills and fulfill my leadership potential by providing quality service to the company, and ultimately myself.

WORK EXPERIENCE

Frontend Web Developer

April 2021- CURRENT -Lagos, Nigeria

TIIDELab

- Developed user interface of websites using HTML, CSS, and JavaScript to enhance visibility.
- Replicated Photoshop and Figma files into animated, responsive web pages using Reactjs to ensure the codes have reusable components.
- Ensured components were written to allow for reusability and DRY code thereby increasing the longevity of the product.
- Wrote Software Requirement Specification & Functional Requirement Documents for different products before building them to ensure the features and process are well documented.
- Thoroughly tested projects on multiple browsers and devices to confirm cross-browser compatibility, accessibility, and responsiveness thereby improving the user experience.

PROJECTS/VOLUNTEERING

June 21- Current - Lagos, Nigeria

HealthXP

- Designed Desktop view, user flow of the web design using Figma.
- Replicated Figma files into animated, responsive web pages using Reactjs.
- Ensured components were written to allow for reusability and optimization.
- Built company's Landing page using Typescript in react to enhance virtual presence.

HACKTOBERFEST

- Contributed to reactjs open-source projects during [Hacktoberfest](#) by adding to the lists of past leaders in Nigeria as required on the website.

KAPPARI ENTERPRISE

- Built the event page for a product ([Sabimech](#)) that links drivers with car repairers thereby increasing the visibility and interactions on the website.

[Dashboard](#) - A dashboard using reactjs and CSS to test my layout creativity.

[Metari](#) - Designed roadmap, market research, user persona, etc for Metarri to understand the metaverse market before building the decentralized app marketplace using different SLDC methods.

[Calculator](#) - A web app that helps users perform basic mathematical operations such as Addition, Subtraction, Multiplication, Division, and [simple interest](#) using JavaScript and CSS.

[Flip Card Memory Game](#) - A web game that checks human retention power. Built with JavaScript and CSS.
